ABOUT ME

I love to learn new things and I want to continue learning for my whole life.
I want to work as a developer, not really minding the technology as I love to discover new things.
I am really Curious and want to satisfy this curiosity as much as I can and continue learning new things through all my life.

SKILLS

C# (.NET Core/Framework/Standard & Xamarin Forms/iOS/Android)	Javascript & Framework (React/JQuery/Vue)
Good	Good
Python	C
Good/Beginner	Learning
Java	Hacking Tools
Good/Learning	Beginner
Driving License	TeamWork
Owned	As an open-space worker
Autonomy	
Good	

LANGUAGES

French	English
Native	Intermediate to Advanced
Japanese	
Total Beginner

HOBBIES

- Music**
- Computer Science & Code**
- Art History**
- Nippon Art and Culture**
- Music Composition and Understanding**
- OpenSource Project Contribution**

WORK EXPERIENCE

Dalkia	(July 2020 - August 2020)
Developer	
Multi Project Developer	
<i>MultiPlatform Mobile App</i>	
Xamarin Forms mobile app to manage all the probe posing with client registration, Excel Interaction, Pdf Render out of each probe and API management of the different probe	
<i>Web Server / DashBoard</i>	
Visual Representation of data fetched from the counter with graphs, table and history. Done with jquery/html/scss	
<i>GSuite Tools</i>	
Encryption Tool for automats keys Recursive Folder Copy through Drive (public/shared/private)	

EDUCATION

Lycée Théodore de Banville	(September 2016 - June 2019)
Bac Baccalauréat	Mention Bien
Scientific Baccalauréat obtained with "Mention Bien" (equivalent to 3.7 gpa) Main Subject studies was Math, Physics, Chemistry, Biology	
UCA IUT	(September 2019 - June 2021)
DUT Computer Science	
Not Finished Yet, in my Second Year. This is a technical diploma that brings us a lot of knowledge on the technical and applicative side but with a big theoretical package too. I've learn as much Technical abilities (code), theoretical abilities (data structure,...) and a lot of soft habilities (Learn to be organised, to have responsibilities, to create and lead a project)	

PROJECTS

React SkillSet	September 2020
https://github.com/romain325/ReactSkillSet	
This project aims to help everybody to get a really simple and smooth Skill Tree to show what they do As I was working with another version on GitHub I decided to recreate it on my own and make it relevant for the ReactJS framework This project has been made to understand and control the Data Visualisation framework called D3.	
Romind	
https://github.com/romain325/romind	
The new Version of my website that I'll later use as a Portfolio, this website is built in ReactJS with a NodeJS BackEnd It is online with Heroku	
Beer App	
https://github.com/romain325/Projet1AS2	
This project has been made for my 1st Year's project and is a beer searcher You can discover new beer by going through a list of selected beer that match your different obligations and tastes. This is made in C# .NET Core	
Probe Project	
https://github.com/romain325/ProbeProject	
This project as been made for Dalkia in a though to create a fully automated process of Certification creation for the people working on the spot.
